To Whom it May Concern,

I first became acquainted with George Jaques through his work co-authoring *A Practical Field Handbook In Industrial Radiography and Radiograph Interpretation*. Mr. Jaques is a member of ASNT and currently certified Level III in radiographic testing.

To assist in the area of technical review, Mr. Jaques is on the list of volunteer subject matter experts, where his knowledge in the field of RT will be utilized to conduct peer reviews on such publications as study guides, question and answer books, and NDT handbooks. It is through the work of such specialized individuals such as Mr. Jaques that ASNT is able to confidently publish books of a highly technical nature.

Best regards,  
Toni Kervina
